

B.R. Kreider & Son, Inc. Goes Green

B.R. Kreider & Son, Inc. employees Tim Good and Bruce Stauffer recently received their Green Advantage Environmental Certification.

A LEED Innovation Credit was recently approved for projects that have a sufficient percentage of their contractor/subcontractor building force Green Advantage Certified at the time of construction. Customers utilizing B.R. Kreider & Son, Inc. on their LEED Green Building Projects will earn one LEED Innovation Credit.

Conservation of natural resources has always been encouraged and considered in B.R. Kreider's business practices. They are reducing their carbon footprint by incorporating environmentally-conscientious practices into their daily operations. Automatic shutdown has been implemented on their fleet of trucks and equipment. Local suppliers are supported to reduce trucking distances. Their on-site Rock Crusher/Recycling Operation provides full recycling services of concrete, asphalt and rock.

B.R. Kreider & Son, Inc., in business since 1936, services include: site management, commercial, agricultural and residential excavation, commercial and residential paving, StreetPrint™ Stamped Asphalt for residential and commercial applications, crushing and recycling material at job sites, residential builder development, pond installation and repair, athletic fields, tennis courts and tracks. Also, state inspections, emissions inspections and repairs of automobiles, light and heavy trucks and heavy equipment are available through their Pin Oak Sales Service Division.
