Project Manager:
Ted Ayres
Construction Manager
717-735-6166

Project Overview:

B.R. Kreider & Son, Inc. provided site construction and paving work on a 2.1 acre site for the Mearig KIA car dealership located south of East Petersburg, Pa. The project required partial demolition of the existing warehouse and site excavation for the proposed 60,300sf impervious area for the building and parking area. Parking for 58 spaces involved an innovative design of **porous paving** with underground storm water storage and infiltration to control storm water runoff. The owner was pleased with the environmental friendly design, which accommodated more parking spaces for the sales lot.

Results:

BR Kreider & Son, Inc. has been advocating the **porous paving** for various applications and designs. We were pleased to help a client maximize their objectives for the project through innovative engineering. As the total site manager, we were able to efficiently co-ordinate and manage the site work to meet and surpass the client's schedule and budget.
