

Solutions Built On Solid Ground

Concrete Surfacing

Protect Your Cows From Slippery Floors

Let B.R. Kreider & Son Give Your Barn A Slip-Resistant Floor!

It's no secret that slick concrete leads to falls and injured cows. This affects your herd and your wallet across the board.

B.R. Kreider & Son Solution

B.R. Kreider's high speed surfacing process uses skid loader mounted equipment to change your floor surface from slick to a rough, but even surface that provides excellent traction across the entire surface.

B.R. Kreider & Son Benefits

- ✓ Slip resistant concrete floor in barns, stalls, walkways or any concrete or asphalt surface
- ✓ Economical – the result you want at a very reasonable rate
- ✓ Speed – no one gets the job done right any quicker, so your cows are back in the barn sooner

Contact us for more details or to learn more about how B.R. Kreider & Son's concrete surfacing can benefit your cows and your dairy!
